

My journey through the desert

I. The Javelinas might be stinky and eat up your yard, but if you ever get to see them i bet you will love them, they are also brown and big but they are as valuable as you.

II. Ocotillo long and spiny blossoms in the Spring brings us lots of butiful things.

III. Singrays are gentle and soft and if you scare it, it may bite and give you a fright.

IV. The gypsum is a white crystal and the malachite is green, green is the color seen on a malachite.

V. Bees come with wonder of life and bring us life to delight.
