

## The Cactus

It seems like you're  
not only a desert plant  
but also a brother  
to the evergreen.

Because you're green  
and spikey and  
your green stays  
through the  
cold Arizona winters.

You also seem like  
not just from the  
hot desert  
but born from  
an evergreen.

Your spikes cover me  
with love.
