The Lone Coyote

The lone coyote walks through the Arizona Sonoran Desert it sees...

A Cactus Wren eating a saguaro cactus fruit from a 15-foot saguaro,

A Kangaroo Rat burrowing in the sandy ground next to the Santa Cruz River,

A Red-tailed Hawk soaring through the blazing summer day looking for its next meal,

A Western Diamond Rattlesnake lurking on the base of a prickly pear cactus,

An endangered male Mexican Spotted owl on a tree top feeding its two babies,

At night a dazzling full moon giving light to the desert sky,

The lone coyote howls as he finds a quiet place to rest.
